Algoritmi un programmēšanas metodes(English)(1),25/26-P T13 - QUIZ - Maximum Network Flow

Started on	Friday, 27 March 2026, 1:36 PM
State	Finished
Completed on	Friday, 27 March 2026, 1:39 PM
Time taken	3 mins 1 sec
Marks	5.00/5.00
Grade	**10.00** out of 10.00 (**100**%)

Question 1

Complete

Mark 1.00 out of 1.00

What approach/idea does Ford-Fulkerson algorithm use?

Select one:

a. Shortest path

b. Naive greedy approach

c. Residual graphs

d. Minimum spanning tree

e. Minimum cut

Question 2	Complete	Mark 1.00 out of 1.00

What does the max-flow min-cut theorem state?

Select one:

- a. Max-flow can never equal min-cut capacity.
- b. Max-flow is always larger or equal to min-cut capacity.
- c. Min-cut capacity is always larger or equal to max-flow in a network.
- d. The value of the max flow is equal to the capacity of the minimum cut.

Question 3	Complete	Mark 1.00 out of 1.00

What do we find in maximum flow problem?

Select one:

- a. Flow from source to sink that is maximum.
- b. Flow from sink to source that is maximum.
- c. Path from source to sink that is maximum.
- d. None of the mentioned
- e. Cut from source to sink that is maximum

Question 4 Complete Mark 1.00 out of 1.00

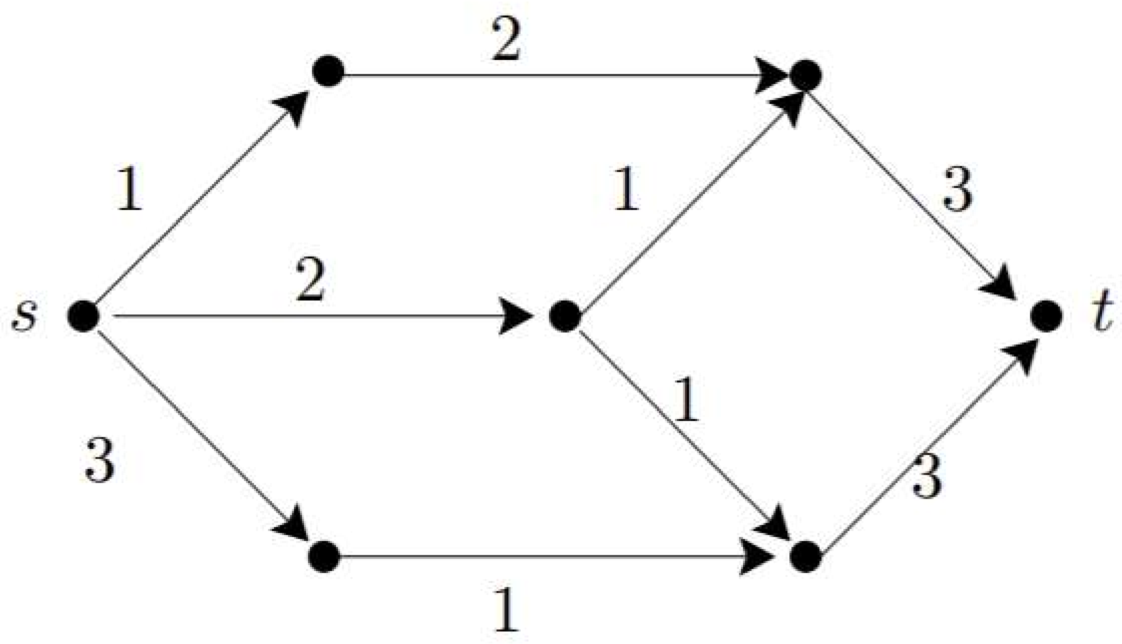
When can a vertex combine and distribute flow in any manner?

Select one:

- a. When vertex is source
- b. When vertex is sink
- c. By arbitrarily changing edge capacities
- d. When vertex is on the shortest path
- e. By maintaining flow conservation

Question 5 Complete Mark 1.00 out of 1.00

What is the maximum flow in the following graph?



Select one:

- a. 6
- b. Other
- c. 5
- d. 3
- e. 4
