> QUIZ - T14 - Parsing

Algoritmi un programmēšanas metodes(English)(1),25/26-P QUIZ - T14 - Parsing

Started on Friday, 27 March 2026, 1:21 PM

State Finished

Completed on Friday, 27 March 2026, 1:36 PM

Time taken 14 mins 18 secs

Marks 5.00/5.00

Grade 10.00 out of 10.00 (100%)

Question 1

Complete

Mark 1.00 out of 1.00

A parser ...

Select one:

- ☐ a. all of the mentioned
- ☐ b. converts raw text into opcodes
- ☒ c. converts raw text into data structure representing input and some syntax
- ☐ d. converts parse tree into raw text
- ☐ e. none of the mentioned

Question 2

Complete

Mark 1.00 out of 1.00

What are differences between top-down and bottom-up parsing?

Select one:

- ☐ a. Bottom-up parsing identifies the root first, top-down starts with leaves
- ☒ b. Bottom-up parsing identifies the leaves first, top-down starts with the root
- ☐ c. Bottom-up parsing removes the leaves first, top-down keeps the leaves
- ☐ d. None of the mentioned

Question 3

Complete

Mark 1.00 out of 1.00

What is Backus-Naur Form?

Select one:

- ☒ a. Syntax notation for context-free grammars
- ☐ b. Advanced goal scoring technique
- ☐ c. None of the mentioned
- ☐ d. Syntax notation for lexers
- ☐ e. General parser for raw text

Question 4

Complete

Mark 1.00 out of 1.00

What are the differences between Lexer and Tokenizer?

Select one:

- ☐ a. Lexer builds AST, tokenizer builds - parse tree
- ☒ b. Lexer is a tokenizer that attaches extra context to tokens
- ☐ c. None of the mentioned
- ☐ d. Lexer flexes, tokenizer tokenizes

Question 5

Complete

Mark 1.00 out of 1.00

What is difference between parse tree and abstract syntax tree (AST)?

Select one:

- ☐ a. None of the mentioned
- ☐ b. They are the same
- ☐ c. Parse tree takes up less space than AST.
- ☒ d. Parse tree is a concrete representation of the input, AST only contains the needed elements from the input for a particular grammar
- ☐ e. Abstract syntax tree can fully reconstruct the original text.
